Dear Dr. Roberts,

Re: Continuing Education Credits / Pacific Training Institute for Facial Aesthetics (PTIFA)

On October 20th, 2009 the Quality Assurance Committee of the CDSBC met to consider the credit eligibility of the Botox and dermal filler courses taught by PTIFA. After a thorough review of the information submitted to the Committee, the decision was made that the courses presented on Botox are eligible for continuing education credits. As to the use of cosmetic dermal fillers, this is not within the dentist's scope of practice, so courses regarding their use are not eligible for credit.

Please note that within any course presented, time spent on marketing these services does not meet the CE requirements and will be deducted from the credit hours.

My apologies for the delay in relaying this information to you.

Yours sincerely,

Heather D. MacKay
Registrar
